

Shannon's Favourite Colours for Face Painting listed by Brand

Fardel Black (liquid)	When I need a liquid black when the Snazaroo has gone gooey in the heat! Also goes on nice and smooth when I want a flat flawless finish. Great for black masks.
Fardel Gold (liquid)	A beautiful soft gold, great for lips and pretty swirls
Fardel Green Gold (liquid)	Gorgeous – use it for anything just because it's so beautiful!!
Fardel Iridescent (pearl) Pink	Beautiful for little flowers and swirls on princesses
Fardel Pink (liquid)	For double dipping with the white for flowers
Fardel White (liquid)	Keep in my kit for double dipping mostly with the liquid pink for flowers
Funky Foxes Bright Green	Perfect frog green, applies really well with a flat brush for a nice even finish. Made by Kryolan.
Kryolan Black	For bases and blending, not great for line work though I've discovered.
Kryolan Bright Yellow	A nice bright yellow
Kryolan Interferenz Bach Blue (aka GB... I think!)	A gorgeous teal sort of shimmery iridescent blue my all time favourite colour
Kryolan Interferenz Mozart Pink (aka 481G... I think)	Subtle iridescent pink, use it lots with other pinks to add shimmer and shine. Apply lightly for a pearly pink base for princesses and faeries.
Kryolan Interferenz Silber (not Silver!)	A pearly white finish, use dry to add highlights, rub dry on lips, etc.
Kryolan Orange	A nice bright orange
Kryolan Royal Blue	A nice bright blue
Kryolan White	Use it interchangeably with Snazaroo White. Good coverage and longevity.
Snazaroo Bright Pink	Use as my base pink for butterflies, then blend or highlight with Interferenz Mozart Pink or WB Magenta
Snazaroo Bright Red	THE definitive Spiderman red. It is also the only Snazaroo colour that works the way it does – goes on smoothly in one swipe of the sponge.
Snazaroo Dark Brown	Nice chocolate brown, good on top of Ochre Yellow for leopard spots, nice fur colour.
Snazaroo Electric Blue	Very striking colour. I use instead of black on butterflies sometimes, blends well with the sparkle colours to create lovely shading. Is the colour for Optimus Prime!
Snazaroo Grass Green	Good Hulk and Ninja Turtle colour
Snazaroo Ochre Yellow	THE perfect colour for Lions, Cheetahs, Leopards, Cougars, and Labrador Retrievers.
Snazaroo Purple	Got to have purple for butterflies. This is a decent purple shade, blends nicely with white and pinks.
Snazaroo Sparkle Blue	Makes great butterflies and “sky” backgrounds
Snazaroo Sparkle Lilac	Nice highlight on top of purples and pinks. Often use on lips and eyelids for princesses. Nice base for swirls and dots designs.
Snazaroo Sparkle Orange	A really great colour for tigers, bright and shiny.
Snazaroo Sparkle Turquoise	Combine with Sparkle Blue and Kryolan Bach Blue for awesome butterflies or winter scenes. Good colour for a “water” base for ocean scenes.
Snazaroo White	I use it all the time for bases – it's dependable and consistent.
Wolfe Bros. Black	Excellent for line work, goes on smoothly, stay's black and doesn't run if applied with the right amount of water. Only problem is can be difficult to get off if around the eyes, etc. I don't use on children so don't carry in my working kit, but use it on adults and myself all the time.
Wolfe Bros. Gold	If you want to do gold details on top of other colours this really works the best of what I've tried so far.
Wolfe Bros. Red	Use it for tongues on top of white or other colours, great for “dripping” blood from teeth, and doing any kind of details on top of other base colours. Does not “bleed” through to turn pink on top of white.
Wolfe Bros. Silver	The best silver – truly metal like, the best for cyborgs, tin men, and painting lines on top of other colours.
Wolfe Bros. UV Green	I like to use this for highlights on anything green. Also a very popular with teens – I do UV Tribal designs with combinations of the UV colours.
Wolfe Bros. UV Magenta or Pink	I interchange these; the Pink is a little lighter than Magenta. Use as a highlight on top of other pinks, great for kitty lips, flowers, dots etc.
Wolfe Bros. UV Orange	All the Wolfe UV colours are great for highlights and accents, dots, etc.
Wolfe Bros. White	The best white for teeth and other details, particularly on top of other colour bases. Stays white, easy to work with for lines.
