REMOVAL

To remove facepaint wash with mild face soap and water with a washcloth. Please be aware that some colours may linger depending on the length of time worn, skin type and method of removal, but it will soon fade.

I follow strict guidelines for hygiene and use clean brushes and sponges for each person. My brushes are washed and sanitized between each use.

Always be aware of the products being used to paint your child's face. Simply being labelled "non-toxic" does not mean the product was intended for use on the skin.

I use products made by Snazaroo, Kryolan, Fardel, Grimas, Wolfe, Mehron, Ben Nye and others. All are made specifically for use on the skin and are made from approved cosmetic ingredients. Snazaroo even has a "Child Safety Rating" which means it can be safely eaten - but it has no nutritional value!
